

FCCTo whom it may concern:

Could you please tell my why NAB has made you aware of the stiff competition that XM is giving the exiting broadcasters. The avaliblity of local programing on Satillights is already a reality on Direct Brodcast Satellite, are they also going to be a target of this campain?? if not you are descrimiating agaist one form of Direct broadcast over another and i think that after spending millions in legal fees the supream court will just junk the law.

So unless all satellight direct brodcast services are going to be limited, you should just let the market forces shape the future.

PS it is sad that the major networks have deteriated to the point where the only local content are traffic and weather and news on which house burnt down today.

Cheers

Alden Fuchs
